A.D. 1897

*Date of Application, 24th July, 1897*

*Complete Specification Left, 25th Nov., 1897—Accepted, 9th Apr., 1898*

PROVISIONAL SPECIFICATION.

**A New or Improved Cure or Relief for Toothache.**

I, FREDERICK GEORGE HIBBERT, of May Villa, Chilwell, Beeston, in the County of Notts, Gentleman, do hereby declare the nature of my invention to be as follows:—

My invention relates to a new or improved cure or relief for toothache and takes  
5 the form of a paste which is applied to the gum in proximity to the aching tooth by rubbing the same therewith or otherwise.

I preparing my improved paste I proceed as follows:—

To any quantity of commercial ground cayenne pepper I add enough liquid  
10 carbolic acid strength 1·050 or thereabouts to well moisten the pepper and I mix the same together with a broad knife or spatula upon a stone or slate slab or the like.

When these two ingredients are thoroughly mixed I add ordinary wheat flour or the like until the whole works up into a paste of the required consistancy when  
15 the same may be placed in suitable wrappers or boxes and is ready for use when desired as above described.

Dated this 23rd day of July 1897.

J. B. FLEURET,

COMPLETE SPECIFICATION.

20 **A New or Improved Cure or Relief for Toothache.**

I, FREDERICK GEORGE HIBBERT, of May Villa, Chilwell, Beeston, in the County of Notts, Chemist, do hereby declare the nature of this invention and in what manner the same is to be performed to be particularly described and ascertained in and by the following statement:—

25 This invention relates to a new or improved cure or relief for toothache and takes the form of a paste which is applied to the gum in proximity to the aching tooth by rubbing the same therewith or otherwise. In the preparation of my improved paste for the purpose above described I proceed as follows:—

To a quantity of commercial ground cayenne pepper preferably about three eighths  
30 of an ounce I add about three fluid drachms of liquid carbolic acid containing preferably about 20 *per cent.* of water so as to well moisten the pepper. I may then add about one fluid drachm of glycerine the same being thoroughly mixed together by means of a spatula or otherwise. Half an ounce or thereabouts of ordinary wheat flour is then added together with about one sixteenth of an ounce of cotton  
35 wool the whole ingredients are then beaten up in a pestle and mortar until the

wool is thoroughly mingled therewith and a paste of the desired consistence is the result when the same may be placed in suitable boxes ready for use when required.

Having now particularly described and ascertained the nature of my said invention and in what manner the same is to be performed I declare that what I claim is:—

5

(1) In a preparation for the cure or relief of toothache forming the same from a mixture of cayenne pepper with carbolic acid of suitable strength and wheat flour to which may be added glycerine and cotton wool the whole being well beaten together and co-mingled so as to form a paste in the manner herein described and for the purposes specified.

10

(2) The preparation for the cure or relief of toothache substantially as herein described and set forth.

Dated this 25th day of November 1897.

J. B. FLEURET,  
5, Hatton Garden, Holborn Circus, London, E.C.,  
Agent for the Applicant.
